## Bestborn Joins Elite Microsoft Dynamics Inner Circle

*Technology firm recognized for superior sales and service*

**GREENSBURG, PA--July 26, 2017--** Bestborn Business Solutions, creators of Loan Vision, today announced its induction into the Microsoft Dynamics Inner Circle, an elite group of Microsoft partners honored for their outstanding achievements in innovative design, sales, and superior commitment to service. The mortgage accounting technology firm (Bestborn) has earned membership for the 2017-2018 year and is recognized as one of only 60 Microsoft Dynamics partners, globally, to earn the award.

“We’re honored to join this highly esteemed group of partners who have leveraged the latest Microsoft technology to simplify and advance business processes,” said Martin Kerr, President of Bestborn Business Solutions. “We plan to take advantage of every resource this membership provides in order to further expand our capabilities.”

Bestborn was officially inducted into the 2017 Inner Circle at the Microsoft Dynamics Partner Recognition Event hosted at the Smithsonian National Museum of Natural History in Washington, D.C., where the new members discussed Microsoft’s upcoming plans. Each Microsoft partner invited to join the Inner Circle is afforded greater access to Microsoft resources, allowing the partners to forge a closer relationship with the world’s leading software provider than ever before.

“Each year we recognize Microsoft Dynamics partners from around the world for delivering innovation and driving unsurpassed customer success,” said Ron

Huddleston, CVP, One Commercial Partner. “Our Inner Circle members are chosen based on their capabilities as an organization, whether that’s creating IP, developing solutions, or having an industry leading focus on digital transformation. Microsoft is honored to recognize Bestborn for their achievements this past year, their dedication to their customers, and their innovation with Microsoft technologies.”

“Early access to Microsoft’s functionality launches and latest updates gives us a highly competitive edge,” said Igor Pchelnikov, CTO at Loan Vision. “This membership creates more opportunities for our team to leverage technology than ever before.”

Built on Microsoft Dynamics NAV, Loan Vision brings enterprise level accounting and business management functionality to the mortgage banking industry and a new option for lenders who require more flexibility in their enterprise software. Loan Vision can consume data from any LOS, efficiently passing detailed loan level information directly into the accounting system, thereby reducing manual workload and avoiding the risks of human error that come with rekeying data. The Microsoft look and feel reduces the learning curve for new users, while IT benefits from a solution fully deployed on the Microsoft suite of technologies. The platform contains modules for Interim Servicing and LO Commission as well as an extensive Branch Reporting module.

#### **About Bestborn Business Solutions, Inc.**

Founded in 2006, Greensburg, PA-based Bestborn Business Solutions are the creators of Loan Vision, a mortgage industry specific financial management & accounting software. Combining the functionality of Microsoft Dynamics NAV and Bestborn’s industry toolset and expertise, Loan Vision has quickly established itself as a platform trusted by some of the largest as well as the fastest growing mortgage lenders in the country.
