Loan Vision Team Launches Super User Training

Company expands commitment to users through exclusive training opportunity

GREENSBURG, PA-- April 26, 2017-- Loan Vision, creators of the mortgage banking industry's fastest growing accounting software, announced today it will host the company's first intensive training course designed for end users. The Loan Vision team's first Super User training was developed to enhance users' knowledge of current system functions and introduce them to its latest functionality.

"Becoming an expert Loan Vision user is by far the best way to get the most from the accounting software investment," said Martin Kerr, President of Bestborn. "Gaining more advanced experience in the solution gives users the power to become a reference point within their own businesses. We encourage users to take advantage of this training opportunity to learn first hand from our team and receive the most in-depth learning experience available."

Offered exclusively to system users, the training delves deep into the solution's key accounting processes. Through a series of sessions, users will gain significant experience with general ledger functions surrounding journals and recurring journals, financial and branch reporting cash management, and the solution's wide range of loan-level functionality.

"We're excited for this opportunity to host a handful of users from across the country," said Carl Wooloff, Business Development Manager at Bestborn. "Since it's difficult to physically meet on a regular basis, hosting the Super User training at our office brings us together to work face-to-face and engage on a more personal level."

In addition to the Super User training, Loan Vision recently opened the registration for its first annual user conference in September, which will feature two distinct learning tracks to reveal insight on technological best practices, system functionality, and the latest industry trends. Attendees will also experience sessions hosted by industry speakers, master classes, and round table discussions.

The Super User training will be hosted by Loan Vision at its office headquarters in Greensburg, PA, with the first session taking place May 22-25, 2017. To meet strong demand, the Loan Vision team will repeat the training, announcing additional training dates for users in the coming months.

About Bestborn Business Solutions, Inc.

Founded in 2006, Greensburg, PA-based Bestborn Business Solutions are the creators of Loan Vision, a mortgage industry specific financial management and accounting software. Combining the functionality of Microsoft Dynamics NAV and Bestborn's industry toolset and expertise, Loan Vision has quickly established itself as a platform trusted by some of the largest as well as the fastest growing mortgage lenders in the country. Functionality includes the ability to interface with Loan Origination Software, loan-level accounting, commission calculations, as well as a branch reporting portal.
